- Q & A session

- Know your audience. Present a logically coherent story.

- Know your audience. Present a logically coherent story.
- Know the merit of your case. Try to highlight or avoid issues according to that.

- Know your audience. Present a logically coherent story.
- Know the merit of your case. Try to highlight or avoid issues according to that.
- Cite previous work very carefully and own your work.

- Know your audience. Present a logically coherent story.
- Know the merit of your case. Try to highlight or avoid issues according to that.
- Cite previous work very carefully and own your work.
- Don't make very harsh criticism about the previous work. Try to use a toned down approach.

- Generally avoid fancy fonts.

# Effective Display

- Generally avoid fancy fonts.
- Take into account how large is the room.

# Effective Display

- Generally avoid fancy fonts.
- Take into account how large is the room.
- Sans Serif and Arial are good choices.

- Tell them what the existing methods are doing.
- Describe your method.

# Talk Arrangement

- In general, the following is a good arrangement.
- Describe the problem briefly.
- Provide a brief outline.
- Motivate the audience sufficiently.
- Tell them what the existing methods are doing.
- Describe your method.
- Provide evidence through simulations and real data.

# Talk Arrangement

- In general, the following is a good arrangement.
- Describe the problem briefly.
- Provide a brief outline.
- Motivate the audience sufficiently.
- Tell them what the existing methods are doing.
- Describe your method.
- Provide evidence through simulations and real data.
- Finally make a good conclusion.

- Present only as much material as can reasonably fit into the time period allotted.

# Timing

- Present only as much material as can reasonably fit into the time period allotted.
- Allot 2 minutes per slide on an average.

- Present only as much material as can reasonably fit into the time period allotted.
- Allot 2 minutes per slide on an average.
- Talk at a pace that everybody in the audience can understand.

- Present only as much material as can reasonably fit into the time period allotted.
- Allot 2 minutes per slide on an average.
- Talk at a pace that everybody in the audience can understand.
- Give proper time to wrap up the talk.

- Present only as much material as can reasonably fit into the time period allotted.
- Allot 2 minutes per slide on an average.
- Talk at a pace that everybody in the audience can understand.
- Give proper time to wrap up the talk.
- PRACTICE it as many times as possible.

- Give proper time to wrap up the talk.
- PRACTICE it as many times as possible.

- You might encounter questions you have no clue about. Try to address them as well as possible.

- You might encounter questions you have no clue about. Try to address them as well as possible.
- Give extended reply to the questions whose answers you know.

- You might encounter questions you have no clue about. Try to address them as well as possible.
- Give extended reply to the questions whose answers you know.
- For clear questions either provide intuition or convince them that this is part of your future work.

- You might encounter questions you have no clue about. Try to address them as well as possible.
- Give extended reply to the questions whose answers you know.
- For clear questions either provide intuition or convince them that this is part of your future work.
- Appreciate the fact that people are asking questions.

Thank you all for listening to me. Hope one day I can follow everything I lectured Today.
